

Topic 4: Australia under attack

Work Sheet 4C: Map Activity

To understand the events of the midget submarine attack on Sydney Harbour, you will need to be familiar with Sydney Harbour and the places that feature in the attack. Study the *Flash* animation on www.w2australia.gov.au/underattack/sydneyharbour.html and enter the following on your map.

You can use your map to help you complete the timeline question sheet on *Work Sheet 4E*.

- Mark North Head, South Head, Harbour Bridge, anti-submarine boom, steel mesh anti-torpedo boom, location of USS *Chicago* and HMAS *Kuttabul*, final location of Matsuo's and Chuman's midget submarines before their destruction.
- Use a dotted line to show the flight path of the Japanese floatplane on its reconnaissance mission over Sydney Harbour.
- Use another line to show the route taken by Ban's submarine for the attack on HMAS *Kuttabul*.
